ABOUT ME

I am a web developer and computer science student who is looking for a web development job. I have experience in creating web applications using PHP, JavaScript, React, SQL, HTML, CSS, and Tailwind CSS. I can create user-friendly websites and interactive web applications. I also manage databases to keep everything running smoothly. I am excited to use my skills to work on new projects in a professional environment.

PROFESSIONAL EXPERIENCE

WEB DEVELOPER INTERN (3 MONTHS)

NOWOTCH,AGADIR,MOROCCO

- Developed and maintained websites using HTML, CSS, JavaScript, PHP, and SQL.
- Designed responsive and user-friendly web pages to enhance user experience.
- Implemented custom themes and plugins in WordPress to meet specific client requirements.
- Collaborated with the development team to troubleshoot and debug web applications.
- Gained practical experience in web development.

OPEN SOURCE PROJECTS

ONLINE BOOK LIBRARY (MSL BOOKS)

MSL Books is a modern web application designed to provide users with a seamless and engaging experience for discovering and exploring a vast collection of books. Built using React.js and styled with Tailwind CSS, this platform leverages an existing API to dynamically fetch and display book data.

MARKS-MANAGEMENT-PLATFORM

A web interface for managing students' notes with login and sign up pages. The interface allows users to generate their report card after completing their own information

NOWOTCH WEBSITE

Designed and developed a dynamic and visually compelling website for Nowotch, a leading provider of network installation and connectivity solutions. The website showcases the company's extensive range of services, including network installation, WiFi rental, 4G/5G relay antennas, and TV/Satellite installation.

GRAPHIC DESIGNER LANDING PAGE (DESIGN HUB)

Designed and developed a dynamic and visually engaging Graphic Designer landing page using HTML, CSS, and JavaScript. This project showcases my skills, creativity, and experience in web development through an interactive and user-friendly web interface
